

CAREER OBJECTIVE

Enthusiastic Computer Science graduate with a strong interest in Artificial Intelligence, full-stack development, and cloud technologies. Passionate about building real-world applications, learning modern AI tools, and solving practical problems through technology while continuously improving technical and problem-solving skills.

EDUCATION

K L University 2021 – 2025 CGPA: 8.79	B.Tech in CSE (Honors) – Cloud Computing Specialization	
Sarada Educational Institutions Board of Intermediate Education (12th)	2019 – 2021	Percentage: 94.4%
Sri Chaitanya Techno School Central Board of Secondary Education (10th)	2018 – 2019	Percentage: 76.6%

SKILLS SUMMARY

- Languages:** Python, JavaScript, Java
- Frameworks:** HTML,CSS, React.js, Node.js, Express.js, Bootstrap
- Databases:** MongoDB, MySQL
- Cloud:** AWS EC2, S3, Lambda, CloudFront, Route 53, CodePipeline, CI/CD
- Core Concepts:** Python, OOPs, DBMS, Networking

PROJECTS

- AI PDF Chat Assistant

React, Node.js, Express.js, MongoDB, Open API

 - RAG Pipeline:** Implemented Retrieval-Augmented Generation workflows using LangChain, vector embeddings, intelligent chunking, and semantic similarity search, improving contextual retrieval accuracy by approximately 85%.
 - AI Integration:** Integrated OpenAI APIs with conversational memory and multi-turn context handling to support intelligent querying across large PDF document collections and generate accurate context-aware responses.
 - Full-Stack Architecture:** Developed scalable REST APIs, secure file upload systems, and responsive React-based chat interfaces supporting concurrent users and real-time AI-driven document interactions with optimized response latency.
- Mental Wellness App

React, MongoDB, Express.js, Node.js

 - Authentication & Security:** Implemented JWT-based authentication, protected routing, and secure session management to ensure safe user access and personalized wellness tracking functionality.
 - Responsive MERN Platform:** Built a scalable MERN-stack application featuring mood tracking systems, personalized dashboards, journaling capabilities, and reusable React UI components for improved user experience.
 - Performance Optimization:** Optimized backend API communication and frontend rendering processes, reducing application response times by nearly 30% while improving maintainability and scalability.
- S3-Based Static Website with CI/CD Pipeline

AWS S3, CloudFront, Route 53, CodePipeline

 - Cloud Deployment:** Built and deployed a production-grade static website architecture using AWS S3, CloudFront CDN, and Route 53 for scalable storage, DNS routing, and low-latency global content delivery.
 - CI/CD Automation:** Automated deployment workflows using AWS CodePipeline and CI/CD integration, reducing manual deployment effort by approximately 80% while enabling zero-downtime production releases.
 - Infrastructure Optimization:** Improved deployment consistency, website availability, and operational efficiency through cloud-native deployment practices and automated release management workflows.

EXPERIENCE

- AICTE Virtual Internship

Virtual Intern

Remote

 - Cloud Computing:** Worked on hands-on cloud computing tasks involving AWS services such as EC2, S3, Lambda, and deployment workflows through AICTE virtual internship programs.
 - Networking Fundamentals:** Gained practical exposure to networking concepts including routing, switching, network security, and infrastructure troubleshooting using enterprise-level virtual lab environments.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate

February 2024
- AWS Certified Cloud Practitioner

October 2023
- Red Hat Certified Enterprise Application Developer

August 2023
